reports on cars

Conclusion And there you have it - you now know how to convert
strings to integers in Python!   If you want to learn more about the
Python programming language, freeCodeCamp has a Python Certification
to get you started.   You'll start with the fundamentals and progress
to more advance topics like data structures and relational databases.
In the end, you'll build five projects to practice what you learned.
Thanks for reading and happy coding!Conclusion And there you have it
